

CY 2022 & FY 2022 National Coding Guide

This coding guide is intended to assist with coding and billing related to select disease sites for procedures performed in an inpatient, outpatient, ambulatory surgical center, and office settings by physicians. This document is only to serve as a guide and not intended to dictate or determine practice patterns. Actual coding will be dependent upon physician orders, documentation and patient needs.

For additional resources, please visit <https://gore.rccsclients.com/>.

TABLE OF CONTENTS

Medicare Payment Systems	3
Medicare National Rate Info	4
Abdominal Aortic Aneurysms (AAA)/EVAR	5
Thoracic Aortic Aneurysms (TAA)/TEVAR	10
Transcatheter Closure of Atrial Septal Defects/Patent Foramen Ovale (ASD/PFO)	14
Biliary Tree Strictures	17
Carotid Artery Stenosis	19
End Stage Renal Disease (ESRD)/Dialysis	21
Endovascular Stent and Stent-Graft Placement with Adjunctive Therapy for Arterial Disease	25
Hernia Repair	29
Surgical Bypass Grafting with Other Than Vein for Peripheral Arterial Disease (PAD)	33
Portal Hypertension/Transjugular Intrahepatic Portosystemic Shunt (TIPS)	40
Bariatric/Staple Line Reinforcement	44
Tissue Reinforcement	49

MEDICARE PAYMENT SYSTEMS

There are multiple payment systems within the Medicare program; this coding guide will focus on the Inpatient Prospective Payment System (IPPS), Hospital Outpatient Prospective Payment System (HOPPS) and Medicare Physician Fee Schedule (MPFS).

Inpatient Prospective Payment System (IPPS)

Hospitals are paid for services on a predetermined, fixed amount based on Diagnosis-Related Groups (DRGs). The hospital will receive a single payment from Medicare based on the diagnosis of the patient and per the procedure code through the ICD-10 PCS procedure coding system. The three – seven-digit alphanumeric codes represented by ICD-10 PCS are different than those billed for outpatient services billed in outpatient hospitals, ambulatory surgical centers and physicians. The first digit of the ICD-10 PCS code represents the section of medical practice the procedure belongs to (surgery) then followed by the body system, root operation, body part, approach and device used. The seventh character is used as a quantifying digit.

The codes reported for the services typically correlate to a Medicare Severity-Diagnosis Related Group (MS-DRG). It is the DRG codes which are tied to the reimbursement based on the complications and comorbidities of the patient. The level of reimbursement will vary based upon the presence or absence of Major Complications and Comorbidities (MCC) or Complications and Comorbidities (CC). Inpatient reimbursement rates are updated on the fiscal year calendar.

Hospital Outpatient Prospective Payment System (HOPPS)

The Hospital Outpatient Prospective Payment System (HOPPS) is the route through which hospital outpatient departments are reimbursed for services provided to Medicare beneficiaries. Services reimbursed under HOPPS are assigned an Ambulatory Payment Classification (APC) with multiple CPT® or Healthcare Common Procedure Coding System (HCPCS) codes receiving the same APC designation. Services considered similar from both a clinical and resource aspect may be placed in a single APC. The rates assigned to the APCs are also a predetermined fixed amount, but unlike IPPS, the reimbursement is not tied to the diagnosis of the patient.

Ambulatory surgical centers (ASCs) follow the payment rules of HOPPS and services are designated as either surgical or ancillary and reimbursement is typically less than hospital based.

Medicare Physician Fee Schedule (MPFS)

Medicare Physician Fee Schedule (MPFS) payment rates are based on three key factors: relative value units (RVUs), geographic practice cost indexes (GPCIs) and the conversion factor (CF), although use of the CF is transitioning to be based on Quality Payment Program (QPP) reporting and incentives. Relative Value Units (RVUs) are assigned to all Current Procedural Terminology (CPT®) codes; RVUs are based on resource costs associated with physician work, practice expense and professional liability insurance. The assigned RVUs are adjusted by GPCIs, which reflect the variances in practice costs for locations throughout the country. The

Conversion Factor (CF) is a scaling factor used to convert the geographically adjusted RVUs into dollar amounts. Starting in CY 2020, the CF will remain at the CY 2019 rate and reimbursements will be based on performance measures under the Merit-based Incentive Payment System (MIPS) and QPP.

MEDICARE NATIONAL RATE INFO

The following pages collectively outline the coding guidelines and Medicare national reimbursement rates under IPPS, HOPPS, ASC and Physician in a facility setting for the following selected disease sites:

- Abdominal Aortic Aneurysms (AAA)/EVAR
- Thoracic Aortic Aneurysms (TAA)/TEVAR
- Transcatheter Closure of Atrial Septal Defects/Patent Foramen Ovale (ASD/PFO)
- Biliary Tree Strictures
- Carotid Artery Stenosis
- End Stage Renal Disease (ESRD)/Dialysis
- Endovascular Stent and Stent-Graft Placement with Adjunctive Therapy for Arterial Disease
- Hernia Repair
- Surgical Bypass Grafting with Other Than Vein for Peripheral Arterial Disease (PAD)
- Portal Hypertension/Transjugular Intrahepatic Portosystemic Shunt (TIPS)
- Bariatric/Staple Line Reinforcement
- Tissue Reinforcement

The coding and reimbursement information on the following pages is not meant to dictate practice patterns. The information serves as a guide to the potential codes and reimbursement if the orders, medical necessity and documentation are appropriate and supported within the medical record. The rates do not reflect the Medicare 2% sequestration reduction.

Endovascular Repair of Abdominal Aortic Aneurysm (EVAR)

Coverage, Coding and Reimbursement Overview — Physician

2022 Edition — All Reimbursement Amounts are Listed at National Unadjusted Medicare Rates and Do Not Include the 2% Sequestration Reduction
Physician rates effective January 1, 2022 through December 31, 2022.

PROCEDURE		REIMBURSEMENT		
CPT® Code ^A	Description	2022 Total Professional/Facility RVUs ^B	2022 Global Surgery Indicator ^C	2022 Rate ^B
34701	Endovascular repair of infrarenal aorta by deployment of an aorto-aortic tube endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, all endograft extension(s) placed in the aorta from the level of the renal arteries to the aortic bifurcation, and all angioplasty/stenting performed from the level of the renal arteries to the aortic bifurcation; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer)	36.35	090	\$1,258
34702	for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, traumatic disruption)	54.15	090	\$1,874
34703	Endovascular repair of infrarenal aorta and/or iliac artery(ies) by deployment of an aorto-uni-iliac endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, all endograft extension(s) placed in the aorta from the level of the renal arteries to the iliac bifurcation, and all angioplasty/stenting performed from the level of the renal arteries to the iliac bifurcation; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer)	40.27	090	\$1,394
34704	for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, traumatic disruption)	66.90	090	\$2,315
34705	Endovascular repair of infrarenal aorta and/or iliac artery(ies) by deployment of an aorto-bi-iliac endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, all endograft extension(s) placed in the aorta from the level of the renal arteries to the iliac bifurcation, and all angioplasty/stenting performed from the level of the renal arteries to the iliac bifurcation; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer)	44.74	090	\$1,548
34706	for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, traumatic disruption)	66.81	090	\$2,312
34707	Endovascular repair of iliac artery by deployment of an ilio-iliac tube endograft including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally to the iliac bifurcation, and treatment zone angioplasty/stenting, when performed, unilateral; for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation)	33.90	090	\$1,173
34708	for rupture including temporary aortic and/or iliac balloon occlusion, when performed (eg, for aneurysm, pseudoaneurysm, dissection, penetrating ulcer, traumatic disruption)	54.11	090	\$1,873

AAA (EVAR) Physician in Facility cont.

PROCEDURE		REIMBURSEMENT		
CPT® Code ^A	Description	2022 Total Professional/Facility RVUs ^B	2022 Global Surgery Indicator ^C	2022 Rate ^B
+34717	Endovascular repair of iliac artery at the time of aorto-iliac artery endograft placement by deployment of an iliac branched endograft including pre-procedure sizing and device selection, all ipsilateral selective iliac artery catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally in the internal iliac, external iliac, and common femoral artery(ies), and treatment zone angioplasty/stenting, when performed, for rupture or other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation, penetrating ulcer, traumatic disruption), unilateral (List separately in addition to code for primary procedure)	13.02	ZZZ	\$451
+34709	Placement of extension prosthesis(es) distal to the common iliac artery(ies) or proximal to the renal artery(ies) for endovascular repair of infrarenal abdominal aortic or iliac aneurysm, false aneurysm, dissection, penetrating ulcer, including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed, per vessel treated (List separately in addition to code for primary procedure)	9.43	ZZZ	\$326
34718	Endovascular repair of iliac artery, not associated with placement of an aorto-iliac artery endograft at the same session, by deployment of an iliac branched endograft, including pre-procedure sizing and device selection, all ipsilateral selective iliac artery catheterization(s), all associated radiological supervision and interpretation, and all endograft extension(s) proximally to the aortic bifurcation and distally in the internal iliac, external iliac, and common femoral artery(ies), and treatment zone angioplasty/stenting, when performed, for other than rupture (eg, for aneurysm, pseudoaneurysm, dissection, arteriovenous malformation, penetrating ulcer), unilateral	36.19	090	\$1,252
34710	Delayed placement of distal or proximal extension prosthesis for endovascular repair of infrarenal abdominal aortic or iliac aneurysm, false aneurysm, dissection, endoleak, or endograft migration, including pre-procedure sizing and device selection, all nonselective catheterization(s), all associated radiological supervision and interpretation, and treatment zone angioplasty/stenting, when performed; initial vessel treated	23.30	090	\$806
+34711	each additional vessel treated (List separately in addition to code for primary procedure)	8.62	ZZZ	\$298

B. Rates are from CY 2022 Hospital Outpatient Prospective Payment System Final Rule, CMS-1753-FC, Centers for Medicare and Medicaid Services.

C. Rates are from the CY 2022 Ambulatory Surgical Center Payment Final Rule, CMS-1753-FC, Centers for Medicare and Medicaid Services.

D. Rates are from the CY 2022 Physician Fee Schedule Final Rule, CMS-1751-F, Centers for Medicare and Medicaid Services. Conversion Factor = \$34.6062.

*Per CMS-1753-FC, device-intensive procedures require the reporting of a device HCPCS code. Device code reporting requirements apply.

Endovascular Stent and Stent-Graft Placement with Adjunctive Therapy for Peripheral Arterial Disease

Coverage, Coding and Reimbursement Overview — Hospital (Facility) Inpatient

2022 Edition — All Reimbursement Amounts are Listed at National Unadjusted Medicare Rates and Do Not Include the 2% Sequestration Reduction
Hospital (Facility) Inpatient rates effective October 1, 2021 through September 30, 2022.

DESCRIPTION ^A	ICD-10-PCS CODE/ CODE RANGE	REIMBURSEMENT		
		MS-DRG ^B	Relative Weight ^C	Rate ^D
Dilation of Right/Left Common Iliac Artery, Right/Left Internal Iliac Artery, Right/Left External Iliac Artery, Right/Left Femoral Artery, Right/Left Popliteal Artery, Right/Left Anterior Tibial Artery, Right/Left Posterior Tibial Artery, Right/Left Peroneal Artery, with Intraluminal Device, Percutaneous Approach	047C3DZ-047U3DZ	252	3.3257	\$21,931
		253	2.6536	\$17,499
		254	1.8159	\$11,975

A. ICD-10-PCS descriptions are from the Medical and Surgical section unless otherwise specified. Abbreviated ICD-10-PCS descriptions. See ICD-10-PCS codebook for complete descriptions.

B. MS-DRG assignment is determined by the patient ICD-10 diagnoses and procedure code(s). Listed are examples of possible MS-DRGs. Injury and trauma not listed.

C. Hospital reimbursement varies significantly based on a number of variables. Relative weight is provided as a constant used in the calculation of individual hospital reimbursement. Relative weights per CMS 1752-F, Table 5.

D. Rates per CMS 1752-F.

*Devices typically utilized for inpatient procedures are generally not reported with C codes. Inpatient-only procedures (Status C) are listed in Addendum E, "HCPCS Codes That Will Be Paid Only as Inpatient Procedures" of the Hospital Outpatient Prospective Payment System Final Rule (OPPS) for the current year.

MS-DRG Descriptions:

DRG 252 Other vascular procedures with MCC

DRG 253 Other vascular procedures with CC

A. ICD-10-PCS descriptions are from the Medical and Surgical section unless otherwise specified. Abbreviated ICD-10-PCS descriptions. See ICD-10-PCS codebook for complete descriptions.

B. MS-DRG assignment is determined by the patient ICD-10 diagnoses and procedure code(s). Listed are examples of possible MS-DRGs. Injury and trauma not listed.

C. Hospital reimbursement varies significantly based on a number of variables. Relative weight is provided as a constant used in the calculation of individual hospital reimbursement. Relative weights per CMS 1752-F, Table 5.

D. Rates per CMS 1752-F.

*Devices typically utilized for inpatient procedures are generally not reported with C codes. Inpatient-only procedures (Status C) are listed in Addendum E, "HCPCS Codes That Will Be Paid Only as Inpatient Procedures" of the Hospital Outpatient Prospective Payment System Final Rule (OPPS) for the current year.

MS-DRG Descriptions

Inpatient-only procedures (Status C) are listed in Addendum E, "HCPCS Codes That Will Be Paid Only as Inpatient Procedures" of the Hospital Outpatient Prospective Payment System Final Rule (OPPS) for the current year.

MS-DRG Descriptions:

DRG 619 O.R. procedures for obesity with MCC

DRG 620 O.R. procedures for obesity with CC

DRG 621 O.R. procedures for obesity without CC/MCC

DRG 326 Stomach, esophageal, and duodenal procedures with MCC

DRG 327 Stomach, esophageal, and duodenal procedures with CC

DRG 328 Stomach, esophageal, and duodenal procedures without CC/MCC

DRG 329 Major small and large bowel procedures with MCC

DRG 330 Major small and large bowel procedures with CC

DRG 331 Major small and large bowel procedures without CC/MCC

Tissue Reinforcement Coding Information for the Facility Purchasing Committee

Bioabsorbable Tissue Reinforcement Hospital Outpatient (Facility) & Physician in Facility

2022 Edition

PURPOSE OF THIS INFORMATION

The addition of new products to the facility formulary often involves review by a cross-functional committee. Review may include evaluation for necessary additions or adjustments to, for example, the facility's inventory and charge systems, to appropriately account for the new products. For this administrative purpose, new products are sometimes correlated with the surgical services in which they are commonly used, either alone or in conjunction with other products or materials.

Bioabsorbable tissue reinforcement is intended for use in the reinforcement of soft tissue. Examples of applications where bioabsorbable tissue reinforcement may be used include hernia repair as suture-line reinforcement, muscle flap reinforcement, and general tissue reconstructions. It is contraindicated for reconstruction of cardiovascular defects.

Bioabsorbable tissue reinforcement may be used in a wide spectrum of surgical services, making it impractical to list all service/procedure codes that could be involved. Instead, examples of particular services with which this material could reasonably be used are provided below. Provision of these codes does not imply the clinical appropriateness for use in any particular clinical situation. Clinical appropriateness can only be determined by a physician on a case-by-case basis. Guidance intended for assistance with coding of individual claims for service requires a much greater level of specificity which is beyond the scope of this review. Please refer to appropriate coding resources and specialty coding guides intended for that purpose.

EXAMPLES: SURGICAL INTERVENTIONS POTENTIALLY UTILIZING BIOABSORBABLE TISSUE REINFORCEMENT

CPT® SECTION ^A	EXAMPLES, CPT® CODE RANGE WITHIN SECTION ^A	EXAMPLES, CPT® DESCRIPTIONS AND CODES ^A
Integumentary	Flaps (Skin and/or Deep Tissues)	15570-15738
	Repair and/or Reconstruction, Breast	19316-19499
Musculoskeletal	Excision, Neck/Thorax	21550-21632
	Excision, Back/Flank	21930-21936
	Excision, Abdomen	22900-22905
	Excision, Shoulder	23065-23220
Mediastinal and Diaphragm	Repair, Diaphragm	39501-39561
Digestive	Repair, Esophagus	43300-43425
	Excision, Abdomen/ Peritoneum/Omentum	49180-49255
	Repair, Hernia	49491-49999

OTHER INFORMATION

HCPCS LEVEL III,III

SUGGESTED COST CENTER	REVENUE CODE	COMMENT
Device C Code (Medicare)	Not applicable for status C - Inpatient only procedures	If used with Medicare approved outpatient procedure C1781 (mesh, implantable, absorbable or nonabsorbable) is appropriate on O.P. claims.
Implantable Devices Charged to Patients	278 - Other Implants	Refer to CMS 2552-10 ^B

A. Listed are common procedures. Review CPT® coding guidelines, modifiers, and NCCI edits for these codes. Current Terminology (CPT®) is a registered trademark of the American Medical Association (AMA). Copyright 2019 AMA. All rights reserved.
